• Kolkata

PROFESSIONAL SUMMARY

Growth-focused Full Stack Developer with 3 years of hands-on coding experience, skilled in building scalable web applications using Spring Boot, HTML, CSS, and JavaScript, and delivering AI-powered features. Proficient in designing reliable backend systems, responsive frontends, and clean RESTful APIs backed by SQL and NoSQL databases. Proactively offsets limited formal work experience by building real-world, production-style projects, demonstrating strong problem-solving skills, technical depth, and a results-driven approach aligned with business and product goals.

Projects

Project 1: Mono Chrome

Online Code Editor

- Developed MonChrome, a full-stack, browser-based code editor using Spring Boot for the backend and HTML, CSS, and JavaScript for the frontend, enabling an interactive and responsive coding experience.
- Implemented RESTful APIs using Spring Web to handle core functionalities such as file operations, code storage, user sessions, and editor interactions between client and server.
- Designed a secure and scalable backend using Spring Security, enforcing role-based authentication and authorization to manage user access, permissions, and protected editor features.
- Integrated Spring Data JPA for efficient database interactions, enabling persistent storage of user profiles, saved code snippets, and editor metadata with clean and maintainable ORM mappings.
- Focused on modular architecture and clean code practices, ensuring maintainability, extensibility, and smooth future enhancements such as compiler integration, AI-assisted coding, or collaborative editing.

Project 2: Recipe Book

A Digital Store for storing cooking recipes

- Built a digital Recipe Book web application using HTML, CSS, and JavaScript, delivering a clean, intuitive UI and smooth user experience for browsing and managing recipes.
- Designed a responsive and visually appealing interface with CSS, ensuring usability and consistency across different screen sizes and devices.
- Implemented dynamic recipe rendering using JavaScript, allowing users to view detailed ingredients, steps, and images without page reloads.
- Enabled recipe saving and management functionality, allowing users to add, edit, and remove recipes for personalized usage.
- Utilized DOM manipulation and event handling to create interactive features such as search, category filtering, and favorite recipes.
- Focused on client-side performance and usability, ensuring fast load times, smooth interactions, and maintainable code structure.

Certifications

Full Stack Web Development Certification – Ayant Software Pvt. Limited

Comprehensive training covering backend development with Spring Boot, frontend development with Angular, database systems (SQL & NoSQL), RESTful APIs, security fundamentals
<https://drive.google.com/file/d/1Uai18oI5yDaMuv1qmXAjDrsNtZbUPS0x/view?usp=sharing>

Google Data Analytics – Coursera

Practical exposure to SQL, data cleaning, and dashboarding.
[Link To Certificate](#)

Power BI Bootcamp – Office Master

Gained hands-on experience in building dashboards and analyzing

Publications

- Published an independent technical article on data usage and digital ethics on ResearchGate.

Education

Techno India University

B.Tech - Computer Science & Information Technology | GPA: **8.61** / 10

11/2022 - 07/2026

Sudhir Memorial Institute

Higher Secondary - PCM | **Percentage: 78.2%**

04/2021 - 07/2022

Agrasain Balika Siksha Sadan

Secondary | **Percentage: 91.2%**

Skills

Backend Development . Java . Spring Boot . Spring Framework . Spring Web . Spring Security . OAuth2 . JWT . Authentication . Authorization . Spring Data JPA . Hibernate . Spring Reactive . WebFlux . RESTful APIs . Microservices Architecture . Event-Driven Systems . Webhooks . SQL . NoSQL . Database Design . Indexing . Sharding . Transaction Management . Caching . Redis . DevOps . CI/CD Pipelines . Docker . Containerization . Linux . Linux Networking . Linux User Management . Shell Scripting . Git . Version Control . AWS . EC2 . S3 . RDS . IAM . System Design . Concurrency . Multithreading . Data Structures . Algorithms . Agile
